EDUCATION

Indian School of Business

Apr 2018 - Apr 2019

Post-Graduate Program in Management (Majors: Strategy & Leadership, Marketing)

- **National Runner-Up (2/100+), ISB Advaita, Techno vision 2018:** Identified pain-points in agriculture value chain
- Recommended solutions leveraging **IOT & Blockchain** to **Telangana Government** to improve farmer's profitability

Amrita Deemed University, Coimbatore

Aug 2010 - May 2014

B-Tech, Computer Science & Engineering - 2nd among 375 students (Top 0.53%)

PROFESSIONAL EXPERIENCE

Career Break | Professional Development

Apr 2026 – Present

Completing the Curious PM cohort, an 8-week program on building AI products, covering LLM fundamentals, AI product strategy, MCP and AI connectors, agents, evals and security, RAG, and fine-tuning.

- Designed and built a personal product portfolio using **Claude Code**, version-controlled on **GitHub** and deployed on **Vercel** (spandana-kintali.vercel.app)

ServiceNow | Senior Product Manager, Platform

Aug 2024 - Apr 2026

Founding PM for AI Control Tower (AICT), ServiceNow's platform for enterprise AI governance. Joined pre-launch to help build the product from Early Access through General Availability, enabling organizations to gain visibility into their AI footprint and manage AI lifecycle and risk.

- Partnered with **8 enterprise design partners** across financial services, healthcare etc. to identify AI governance personas and jobs-to-be-done, translating customer needs into requirements that shaped AICT's first version.
- Orchestrated a **single-release rollout of third-party (3P) model-provider controls** across 6 teams and multiple products, enabling governance enforcement across regulated and non-regulated markets for ServiceNow's entire Pro Plus customer base.
- Drove execution of ServiceNow's **Long-Term Stability (LTS) model strategy** for financial services, coordinating 6 teams to translate the strategy into AICT capabilities supporting a leadership-identified **\$300M upsell opportunity**.
- Filed a **patent application as named inventor** for a CMDB-based AI asset inventory design underpinning AICT's core AI discovery capability
- Advanced AICT's enterprise AI governance strategy by securing **Snowflake and Hugging Face licensing approvals**, assessing their platform ecosystems, and translating the broader strategy into PRDs for engineering delivery through Service Graph Connectors
- Owned the **product experience for an AI agent** recommending missing asset details, evaluating source credibility and defining an inline, steward-approved recommendation flow to close gaps in the AI asset inventory

ServiceNow | Senior Product Manager, HR Service Delivery

Nov 2021 - Jul 2024

Manager Hub – Team Skills Intelligence

Owned the 0-to-1 strategy and delivery of Manager Hub, giving managers visibility into team skill gaps and workforce development needs. Shipped to General Availability in early 2024 and reached ~1,200 global customers.

- Led a cross-functional team of **8 engineers, 1 UX designer, and 1 visual designer** from discovery through General Availability, driving product direction, execution, and launch.
- Conducted customer research and competitive benchmarking against **Fuel50, Eightfold AI, and Hitch**, translating manager pain points around fragmented, spreadsheet-based skill tracking into product vision and a differentiated roadmap
- Partnered with **Account Executives and Customer Success** to position Team Skills Intelligence in renewal conversations, supporting renewal outcomes across multiple strategic HRSD accounts
- Partnered with platform and product engineering teams to scope API dependencies and integrate skill data with **Learning and Growth Plan** applications, creating a unified view of team-member development activity for managers

Employee Document Management

*Owned the strategic vision and product success of Employee Document Management for HRSD, a **\$70M ACV** product serving **150+** enterprise customers.*

- Spearheaded product vision and roadmap for the Employee Document Management module across **4 major releases**, expanding document management capabilities across the complete Hire-to-Retire HR lifecycle
- Achieved product-market fit for document management across the Hire-to-Retire lifecycle, contributing to **40% growth in sales pipeline**

- Supported the closure of **10+ deals worth \$30M+**, contributing to expansion and upgrade opportunities across existing customers

Zenoti | Senior Product Manager

Apr 2021 – Oct 2021

Built a SaaS product that helps small businesses in the beauty & wellness industry to manage their day-to-day operations

- Conceptualized & implemented the product flows from **sign up** to **on-boarding** across iOS & Web for the MVP launch
- Created **KPIs** for the product & developed **dashboards** to actively track **user metrics** from acquisition, engagement to retention
- Devised and implemented the user communication strategy which helped to **reduce the sign-up abandonment rate by 20%**
- Collaborated with 2 product teams, UX & VISD and cross functional teams - marketing and sales for the product launch

OpenText Corporation | Product Manager

May 2019 - Apr 2021

Designed & Launched modules in Content Suite Platform, an Enterprise Content Management software used by 300+ customers

Product Management & Strategic Initiatives

- Launched a **solution accelerator**, Event Action Center that executes actions based on events triggered from leading systems
 - Facilitated **acquisition of 10+ new** customers by implementing a code free, easy to configure & intuitive automation engine
 - Improved the **productivity of admin users** by **40%** by reducing the configuration time (**~30 min vs 2days**) of business processes
 - Successfully **negotiated** business **partnerships** with CRM & ERP software vendors by supporting 3 out of the box integrations
- Owned product roadmap for enterprise collaboration module in Content Suite platform across 2 major releases
 - Increased the overall **customer adoption** of the module by **60%** by ideating & implementing a smart widget to track **reminders**, a feature extensively used by 80% of customers, complemented by **smart email notifications**
 - Saved maintenance costs of legacy user interfaces by migrating premium customers from Classic (old) to Smart UI
- Conceptualized a one stop solution that **digitizes** & automates the **Onboarding** of prospective employees across organizations
 - Implemented the solution & **won a \$6.7M deal** by liaising with cross functional teams including sales, consulting & engineering

Stakeholder Management

- Interfaced** with **20+** customers world-wide to understand business requirements & performance issues in the cloud environments
 - Partnered with architects & cloud team to fast-track development of **health-monitoring dashboards** that check server statuses
 - Gained **customer's confidence** by ensuring quick resolutions (**~20min vs 2hrs**) during severe outages **leading to customer retention**
- Collaborated with a product team of 8, UX & VISD across several releases to launch features by practicing **Agile** methodologies
- Conducted product breakout sessions for partners, customer support & sales demonstrating latest features & product roadmap

Achievements

- Recognized by Senior Management with **"Spot Award"** for instrumental contributions towards strategic vision of the organization

Oracle India | Applications Developer II

Jan 2016 - Feb 2018

Designed & Developed features for project management software, Unifier, a cloud-based product used by 100+ customers

Product Design & Development

- Architected & developed a **smart cloud-based product** that identifies servers, restores, & masks customer databases
 - Institutionalized product in **7** teams at Oracle; automated **90%** of steps, **saving \$60K/year** (1000 man-days)
- Ideated **user-activity auditing feature** to track workflow changes & ensure **zero data breach** during product migrations
 - Improved **credibility** of Unifier data management systems; **prevented loss of \$10M** by maintaining data sanctity

Oracle India | Applications Developer I

Jun 2014 - Dec 2015

Product Development

- Collaborated with **cross-functional teams** to develop the **business logic** of cost management module in Unifier
 - Revamped UI using **OJET**; Successfully **migrated 75%** (150/200) of customers to latest version of product
- Identified among 25 **"Future Leaders"** out of 700 employees across Oracle Global Business Units as part of mentorship program

INTERESTS & EXTRA CURRICULAR ACTIVITIES

- Create UTG 2025 Hackathon, ServiceNow:** Product Advisor guiding teams to refine and pitch innovative AI governance solutions.
- ISB Brand Ambassador:** Among 8% of cohort selected to propagate ISB's image, mentor incoming batch on essays & life @ ISB
- Member, Corporate Social Responsibility, Oracle:** Organized blood donation camps, charity events for NGOs
 - Handled budgets of **INR 25-30K** to conduct the events & managed 10-15 volunteers to coordinate activities
